

# Portugal in HyWays II

**Commitment-Resources-  
Opportunities**

Brussels, 11<sup>th</sup> May 2005

# Commitment

- Building an innovation platform:
  - Strong existing network, gathering main players and largest energy companies: Ap2H2 ([www.ap2h2.pt](http://www.ap2h2.pt) )
  - Recently approved project for the National Hydrogen Strategy – Hi-Po involving significant expertise and human resources
  - Deep knowledge of HyWays process.

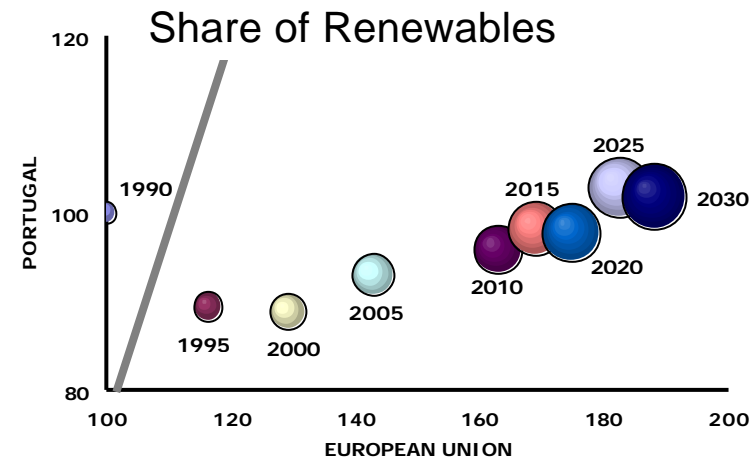

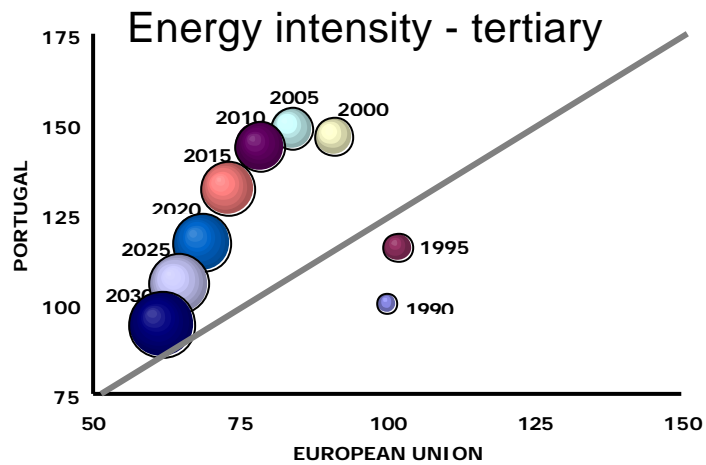

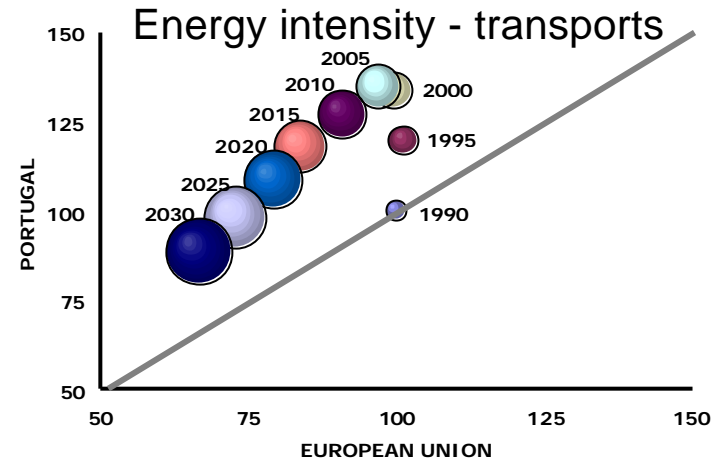

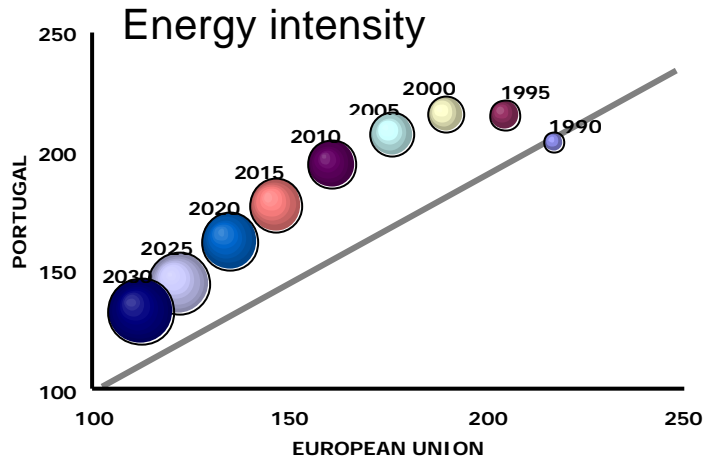

# Resources

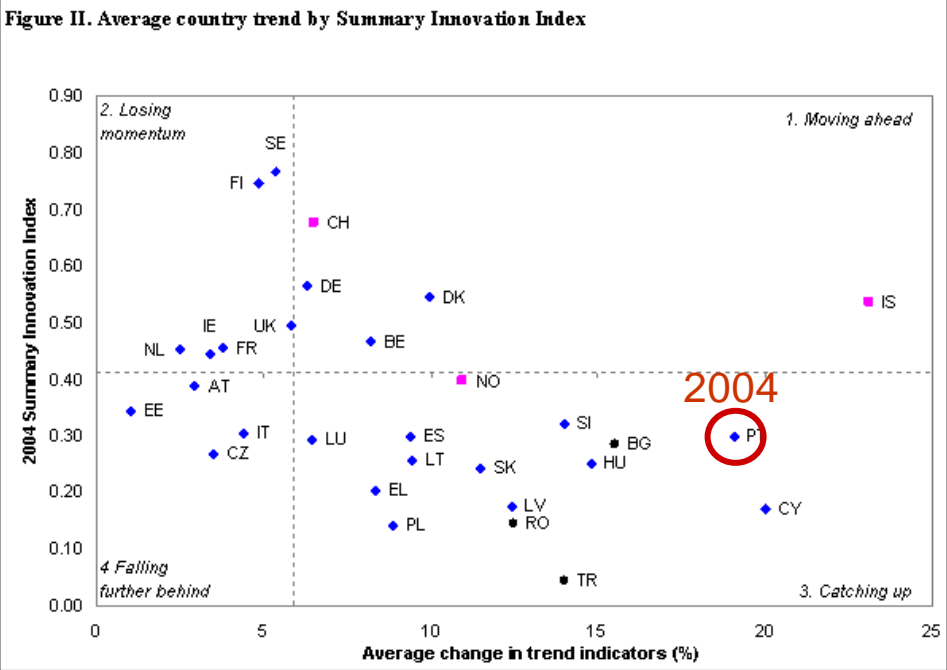

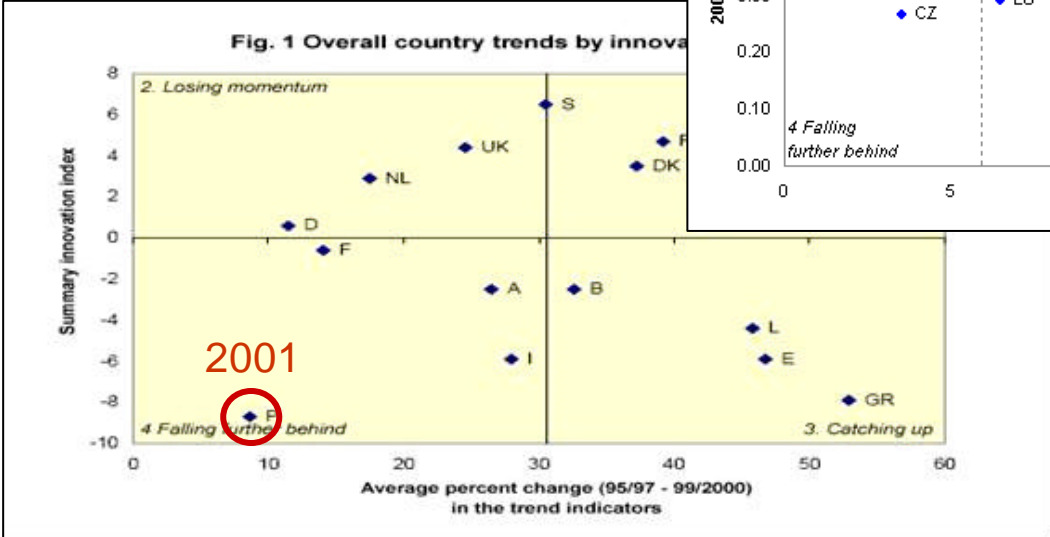

- **Challenging targets – delivered results**

- Successful hydrogen demonstration projects, including the Porto CUTE buses. Lisbon is positioning for participation in Hy-Com.
- Dynamic innovation environment and economic growth prospects.
- Sizeable investment in fuel cell and hydrogen research, relative to other countries of similar size.
- Extensive participation in hydrogen and fuel cell projects and networks (including HTP Mirror Group) at EU level.
- Existence of fuel cell developers and manufacturers in portable applications.
- Government approved strategy for new energies development – special tariff for Pilot projects established.
